DETAILED ACTION

Claims 1-4 are presented for examination on the merits

Specification

The disclosure is objected to because of the following informalities: The word seed is misspelled throughout the specification (see, e.g. p.7, line 22).

Appropriate correction is required.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Hata et al. JP 02000327550A, cited by applicants.

A whitening agent (cosmetic or skin preparation) comprising camu camu seed extract and gallic acid and salts thereof is claimed.

Hata et al. teach a skin preparation for external use which is capable of preventing the production of lipid peroxides and inflammation, blackening (preventing blackening reads on whitening) and aging of skin and having excellent scavenging effects on active oxygen by including an extract of camu-camu fruit (see abstract).

Please note that the camu-camu fruit inherently contains seeds therein and, therefore, the fruit extract taught by Hata et al. would inherently contain camu-camu seed extract therein as instantly claimed. Hata et al. also do not explicitly teach a

preparation which further comprises gallic acid and salts thereof, however, gallic acid is a natural component of almost all plants (see e.g. phytochemicals.com), therefore, gallic acid would have inherently been present in the preparation taught by Hata et al.

Therefore, the reference is deemed to anticipate the instant claims above.

Conclusion

No claim is allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
